CAREER OBJECTIVE

Full-Stack Developer (MERN) who builds backend-first: designing the data model, authentication system, and API contract before the interface that sits on top of it. Experience shipping production systems with hybrid authentication (JWT + sessions), role-based access control, and full test coverage (Jest, Supertest, Vitest, Cypress). Currently completing the IBM JavaScript Back-End Development Professional Certificate. Seeking a backend-focused or full-stack junior/internship role (on-site, hybrid, or remote) to work on systems that carry real users and real data.

SKILLS

Backend: Node.js, Express.js, RESTful API Design, JWT & Session Authentication, RBAC, Middleware
Database: MongoDB, Mongoose, NoSQL Schema Design
DevOps & Testing: Docker, GitHub Actions (CI/CD), Railway, Jest, Supertest, Vitest, Cypress
Frontend: React.js, React Hooks, Tailwind CSS, Material UI (MUI), Bootstrap
Languages: JavaScript, HTML5, CSS3, C++, Java
Tools: Git, GitHub, Firebase, Cloudinary, Figma

WORK EXPERIENCE

Full Stack Development Intern

CodeAlpha — Remote | Jul 2026 – Aug 2026

- Completed a full-stack internship building production-grade MERN applications end-to-end, from database design to deployment.
- Delivered two full-stack projects (see Projects section) covering hybrid authentication, real-time collaboration, and CI/CD deployment.
- Worked independently through the full engineering lifecycle: requirements, architecture, implementation, testing, and deployment.

PROJECTS

HE Skincare — Production E-Commerce Platform (MERN) 2026

Source: github.com/A422789/SkinCareReactProject

- Shipped a bilingual (AR/EN) e-commerce platform to production for a real paying client.
- Designed a hybrid auth system (JWT + sessions + TTL-based token blacklisting) preventing session leaks and unauthorized access.
- Built an automated WhatsApp order-alert gateway with persistent session storage, removing the need for manual order follow-up.
- Covered by Jest, Supertest, Vitest, and Cypress; deployed via Docker and GitHub Actions CI/CD.

Collaborative Project Management Tool (MERN) **2026**
Source: github.com/A422789/Project-Management-Tool

- Eliminated session-leak and race-condition risks common in real-time apps via a hybrid auth guard with sub-200ms token refresh.
- Reached 100% core test coverage across auth, task, and collaboration flows.
- Containerized with Docker and deployed via Railway with automated CI/CD on every pull request.

Neoteric Technologies — Company Web Platform / CMS (Node.js, Express, MongoDB) **2026**
Source: github.com/A422789/FullStackProject

- Built a full CMS driving a public company site and an admin dashboard across 7 content types (services, projects, team, blog, messages, settings).
- Implemented JWT authentication with role-based access control and token blacklisting for secure admin logout.
- Deployed backend on Railway and frontend on Vercel with environment-based configuration.

EDUCATION

Bachelor of Science in Software Engineering **Expected Graduation: June 2028**
Riphah International University — Islamabad, Pakistan

CERTIFICATIONS

Pursuing: IBM JavaScript Back-End Development Professional Certificate (Coursera)

- Node.js & MongoDB: Developing Back-End Database Applications — IBM, Jun 2026
- Developing Back-End Apps with Node.js and Express — IBM, Apr 2026
- Get Started with Cloud Native, DevOps, Agile, and NoSQL — IBM, Apr 2026
- JavaScript Programming Essentials — IBM, Mar 2026
- Getting Started with Git and GitHub — IBM, Feb 2026
